Homework # 3. First Review of the Final Project.

DUE DATE: *At the end of class on July 18th, 2017.*

DO NOT *send the homework via email.*

Work as a group and report in English, the activities performed while developing the final project. You must report only one document as a group, and place it in SIDWeb 4.0, section “Trabajos” and handed-in at the end of the class.

This first report must contain at least the analysis of the requirement of the project assigned, and must be reported using a formal modeling language. If a shell will be used, the group must report the decision taken based on the characteristics, strengths and weakness identified during the evaluation of different shells, and the discussion of the potential design.

See the Final Project and HW 3 and HW 4 document, for details of the assignments.
